

Swift

THE 2000 RPM BURNISHER FROM CENTAUR

Introducing the Swift. We think it's time you met our burnisher, even if you are satisfied with your machine. Because the Swift isn't just another burnisher: it's designed and manufactured by Centaur. If you know Centaur Floor Machines, you know what that means: high quality, reliability, advanced design, and North American availability of parts and service.

If that's not enough, here are 9 more rea-sons for choosing the Swift:

SPECIFICATIONS / INFORMATION

- Pad revolution - under load: 2000 rpm
- Pad diameter and Path width: 20 inch
- Motor - direct current: 1.5 hp
- Weight: 101 lbs / 46 kg
- Cable length: 100 ft / 30 m
- Pad pressure (adjustable): 12 lbs to 14 lbs
- Automatic pad pressure adjustment: Yes
- Dust collector system: Yes
- Protecting fuse: 14 Amp
- Ampere draw: Minimum 12 Maximum 15

The base, the handle and the cable of the Swift are **separate components**. They can be detached for easy lifting, transportation and storage.

The Swift is equipped with a **dust collector system**.

SWIFT FEATURES and ADVANTAGES

1 The entire pad of the **20 inch burnisher** is in constant contact with the floor during cleaning operations. This is achieved by the employment of the parallel links principle, which allows the pad to stay parallel to the floor at all times.

2 **Pad pressure** can be monitored with the built-in amp meter (the amperage can be adjusted to the desired level, thus eliminating blown fuses). Adjustments are made with the aid of a spring tension knob.

3 Because the **friction** between the pad and the floor is constantly changing, the spring-suspended pad drive disk automatically adjusts the pad pressure to the varying floor conditions.

4 Because the **pad is withdrawn** from the floor when the Swift is off, you may safely leave the pad on the machine. This feature also eliminates the risk of burning the tile at start-up. This is known as the turtle effect.

5 The **main fuse** is protected from overload by a fourteen ampere circuit breaker, located in the switch box.

6 The Swift is the only machine on the market which comes equip-

ped with a **100 ft. cable**. Twist lock connectors allow the operator to vary cable length and replace damaged cable on the spot.

7 **Offset handle and wheels** and the unusual design of the base, allow the operator to clean under display shelves and furniture.

8 The Swift's **cable hook** automatically releases the cable once the handle is positioned to the operator's level

9 The **dust collecting system** prevents dust from rising and settling on furniture, shelving and stock.

There you have it - 9 features we believe make the Swift the best burnisher on the market. Take a look at the competition, and the Swift. We think you'll agree.
